Climate targets and actions in Finnish municipalities

Cities for Climate Change Campaign
Cities for Climate Change Campaign:

We urge the Finnish delegation to promote an ambitious climate agreement in Paris COP21!

And promise to tackle climate change in many ways at municipal level.
Climate Action in Finnish Cities: Riihimäki

- Riihimäki in Cities for Climate Protection —campaign since 1998
  - Climate strategy 2020: "towards carbon neutral Riihimäki"
    - aims to lower the consumption-based carbon dioxide emissions of the city by 25% until 2020
  - Energy efficiency action plan
  - Computing of greenhouse gas emission discharges in the city area since 1990 and monitoring of the consumption-based carbon dioxide emissions with CO2-report

- Climate issues and energy efficiency in the environmental policy and EMS-work of the municipality
  - Environmental report to monitor the realization of environmental goals such as controlling of climate change and anticipation to it
    - EMS-work in the working unit’s and daughter companies every day work
  - Joining the sustainable procurement network and sustainable development as a strategic goal in the procurement strategy of the municipality

- Peltosaari-Project
  - Developing the Peltosaari suburban area – one of the goals of new construction is to aim in to more energy efficient solutions and use renewable energy
  - Suburbanlab-project: two of the three goals concern energy saving
